# Global Webinar for Complementors

February 2024

Complementors Team

# Agenda

1. Admin notices
2. Zero Footprint Model – Ashutosh Chaturvedi
3. RMA Migration – Chris Martis
4. Payment Investigations – Laurent Lemaire & Garima Tripathi
5. CBPR+ self-attestation – Supriya Dahiwelkar
6. Q&A

## Admin notices

- This presentation is being recorded
- The content will be published on swift.com (<https://www.swift.com/standards/iso-20022/iso-20022-past-webinars>)
- Global webinar for Complementors occur the last Thursday of every month and you can register 2 weeks before each event here: [Global Webinar for Complementors](#)
- To ensure you receive communications from us while we remain GDPR compliant please [update your preferences here](#) (you will need to login to / create your free Swift account) to include the interests 'Payments' and/or 'Standards' and we will ensure we keep you informed about:
  - Global webinar for Complementors Invitations
  - Relevant developments on ISO 20022 and Transaction Management
  - Updates from Swift's Market Practice team
  - The latest info on adoption enabling tools and support
- Support requests / queries should be raised via the [Support](#) page

# Zero Footprint Model – API Connectivity Portfolio

Feb 2024  
Global webinar for  
Complementors

# API Connectivity portfolio

## Connectivity options

Swift Security SDK license

**Swift zero-footprint**

**Swift Security SDK**

Explains MV-SIPN security model based on a channel certificate. You can implement your own SDK or Microgateway based on it (any language)

Takes out the complexity of implementing MV-SIPN's APIs security model from your shoulders. You can implement your own SDK or Microgateway based on it (Java only)

Apache License 2.0

**Swift SDK**

Ready to use API Client supporting ISO 20022 you can embed in your Java application

**Swift Microgateway**

Ready to use API Proxy taking out the Complexity of implementing MV - SIPN's APIs security model from your shoulders. Important: You will have to implement your API Client on top (any language) or you can rely on Swift SDK used in combination

**Swift SDK**

**Swift Microgateway**

Use of Swift SDK over Swift Microgateway

Feb 2024  
Global webinar for  
Complementors

## Zero Footprint - Overview

Feb 2024  
Global webinar for  
Complementors

- Build & Implement your API client in any programming language
- Guidelines offered by Swift for establishing MV-SIPN security model based on Channel Certificates

Supports Swift Content APIs  
Customer owned and managed

No Language Dependency

Local Channel Certificate /  
Swift Multi cloud KMS

CSP: Customer Connector (A4)

Updates: No Security patches

- Swagger Codegen
- OpenAPI Code Generator
- Build API Client from Scratch

# Zero Footprint – Customer Journey

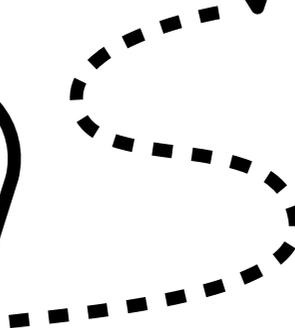

Feb 2024  
Global webinar for  
Complementors

## Enhance & Innovate

- Customize as per business requirements
- Enable new API services offered by Swift
- Reuse previous API implementations

3

## Maintenance

- Manage and maintain as per internal policies
- No Swift mandated updates

2

 Swift developers

## Implementation

- Available Reference Code in multiple language
- Choose you programming language
- Reuse existing infrastructure (ex: API gateways)

1

## Zero Footprint – Sample Codes

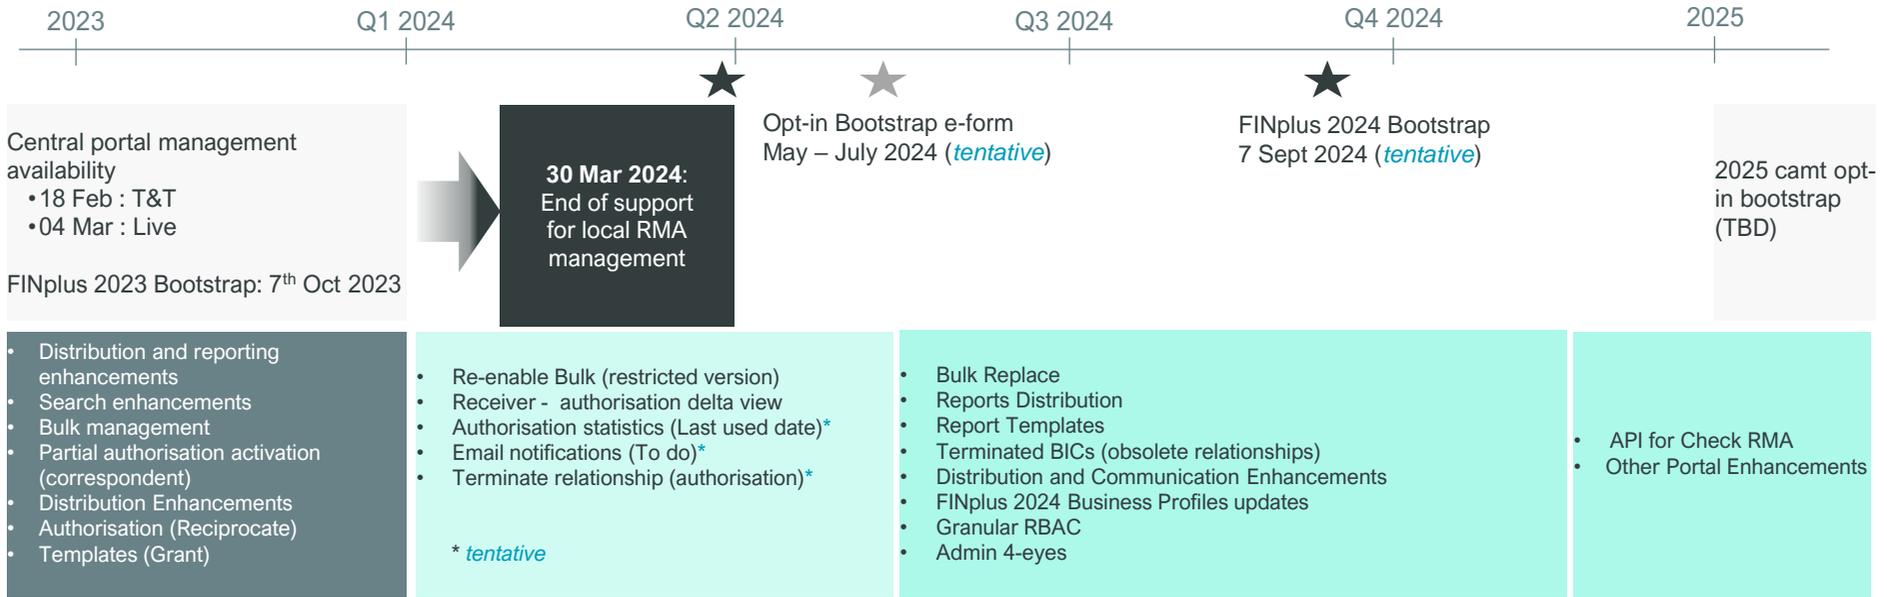

- Sample code in different languages
  - Javascript, Python, Spring Boot, Quarkus and .NET
- Help developers get up and running faster with a particular language
- Sample code can be used as Quick Start templates for any other Swift API
- Swagger UI graphical interface used to visualize and interact with the API
- Code available at [GitHub](#)
  - Vulnerable dependencies fixed and [patched automatically](#)
  - Code always up to date with latest dependencies
  - Regression testing performed on every change

# RMA Migration

Feb 2024  
Global webinar for  
Complementors

# RMA Portal Timeline

Feb 2024  
 Global webinar for  
 Complementors

## Messaging Services in scope of RMA Portal

In scope FIN and FINplus	
Service name	Environment
swift.fin	Live
swift.fin!p	Pilot
swift.finplus	Live
swift.finplus!pc	Pilot
swift.finplus!pf	Pilot

In scope MI services	
Service name	Environment
nt.iso.snf	Live
nt.iso.snf!p	Pilot
sadc.iso.snf	Live
sadc.iso.snf!p1	Pilot
sadc.iso.snf!p2	Pilot
sadc.iso.snf!p3	Pilot
sadc.iso.snf!p4	Pilot
sadc.iso.snf!p5	Pilot
sadc.iso.snf!p6	Pilot

## Messaging Services not in scope of RMA Portal

Out of scope	
Service name	Environment
swift.corp.fa	Live
swift.corp.fa!p	Pilot
swift.corp.fast	Live
swift.corp.fast!p	Pilot
swift.generic.fa	Live
swift.generic.fa!p	Pilot
swift.generic.fast	Live
swift.generic.fast!p	Pilot

# RMA Portal – One Pager

Feb 2024  
Global webinar for Complementors

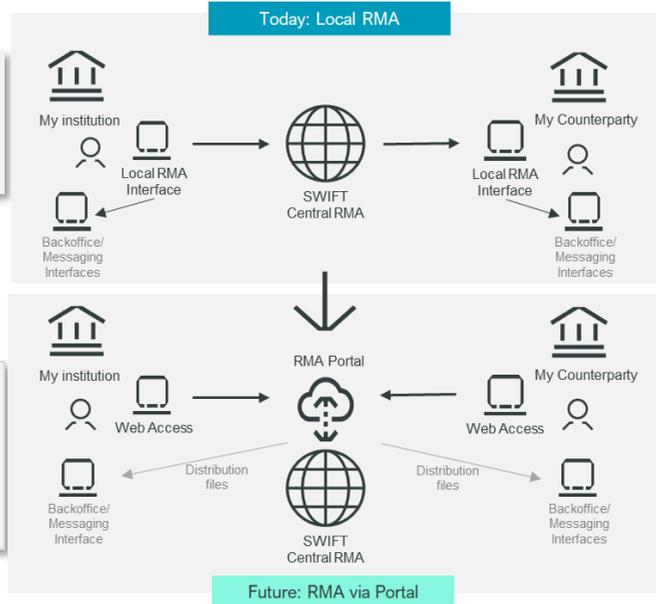

**Evolution**

**Drivers for change – current limitations**

- Distributed nature leads to de-synchronisations
- Technical authorisations limit business interop (e.g. ISO)
- Limited ability to enable new interactions (e.g. api)

**RMA Portal – the way forward**

- Single central source of truth
- Transparency across counterparties
- Business profiles provide service agnostic authorisations
- Common solution across participants
- Realtime synchronization with local filters

## Key Actions and Dates

- Customers must migrate to the RMA Portal by 30 Mar 2024
- No network support to exchange RMA using local Interfaces after 30 Mar 2024
  - No new RMAs can be created, accepted
  - Existing RMAs cannot be changed, rejected, revoked

## Main steps

- Reference: [Customer Journey to RMA Portal migration](#)
- Set-up Access to RMA Portal (Pilot and Live)
    - Set-up Portal access
    - Set-up Roles
    - Setup RMA Delegation
  - Migrate to RMA management on RMA Portal (Pilot)
    - Activate Pilot BICs on RMA Portal
    - Exchange RMA on RMA Pilot
    - Define and test distribution files/local filtering
  - Prepare for Migration to RMA Portal (Live)
    - Verify Central RMA authorisations
    - Define local filtering strategy/distribution files
  - Migrate to RMA management on RMA Portal (Live)
    - Setup distribution files
    - Activate Live BICs (one at a time or as needed)
    - Complete all Live BIC activation
  - Use RMA Portal for all RMA management for all BICs
    - Discontinue use of Local RMA interface

## Resources

  - [RMA Evolution \(Introduction\)](#)
  - For Instructor led paid trainings contact your account or service manager.

- Resources**
- [RMA Application Support Page](#)
  - [RMA Evolution Frequently Asked Questions](#)
  - [RMA Portal Migration and Roadmap \(presentation\)](#)
  - [RMA Portal Subscription and BIC delegation](#)

## RMA Portal – some considerations

### RMA Portal

#### What services are supported (in live RMA Portal, and on ITB)?

- Listed in the previous slide and documented in the RMA [GS](#).
- RMA Portal will not be supported in ITB.

#### Can I access RMA Portal from from ITB? - No

#### Can I receive RMA distribution files on ITB? – No

#### If not on ITB how can I test in pilot?

- The option of using ETPX BICs and have a connected BIC in Pilot to use the Portal
- This ETPX BIC is available to Service Providers and Partners

### I am a messaging interface provider

#### How do I get the RMA authorisation for filtering traffic? Do I have to automate the update?

- The automated distribution file from RMA Portal can be used to update local RMA filters.
- The local Interface can provide automation for RMA distribution file imports.

#### Do I have to filter traffic?

- This is an optional capability that customers can use based on their use case/volume.
- Customers can selective enable send or receive filtering.
- Customers could enable send filtering to avoid network NAKs for large volumes of dynamic relationships

#### Is there a change in the ASP file? Or in the RMA distribution file downloaded from the RMA Portal?

- There is no RMA related changes to ASP specs nor to the RMA distribution file specs.

### I am an RMA interface provider

#### Is my application obsolete?

- Customer requiring local or non-network RMA support can continue to use your interface.

#### What are the remaining services still using swift.rma service I have to support?

- No other network services will use swift.rma

### Customers

#### How will the migration happen for my customers?

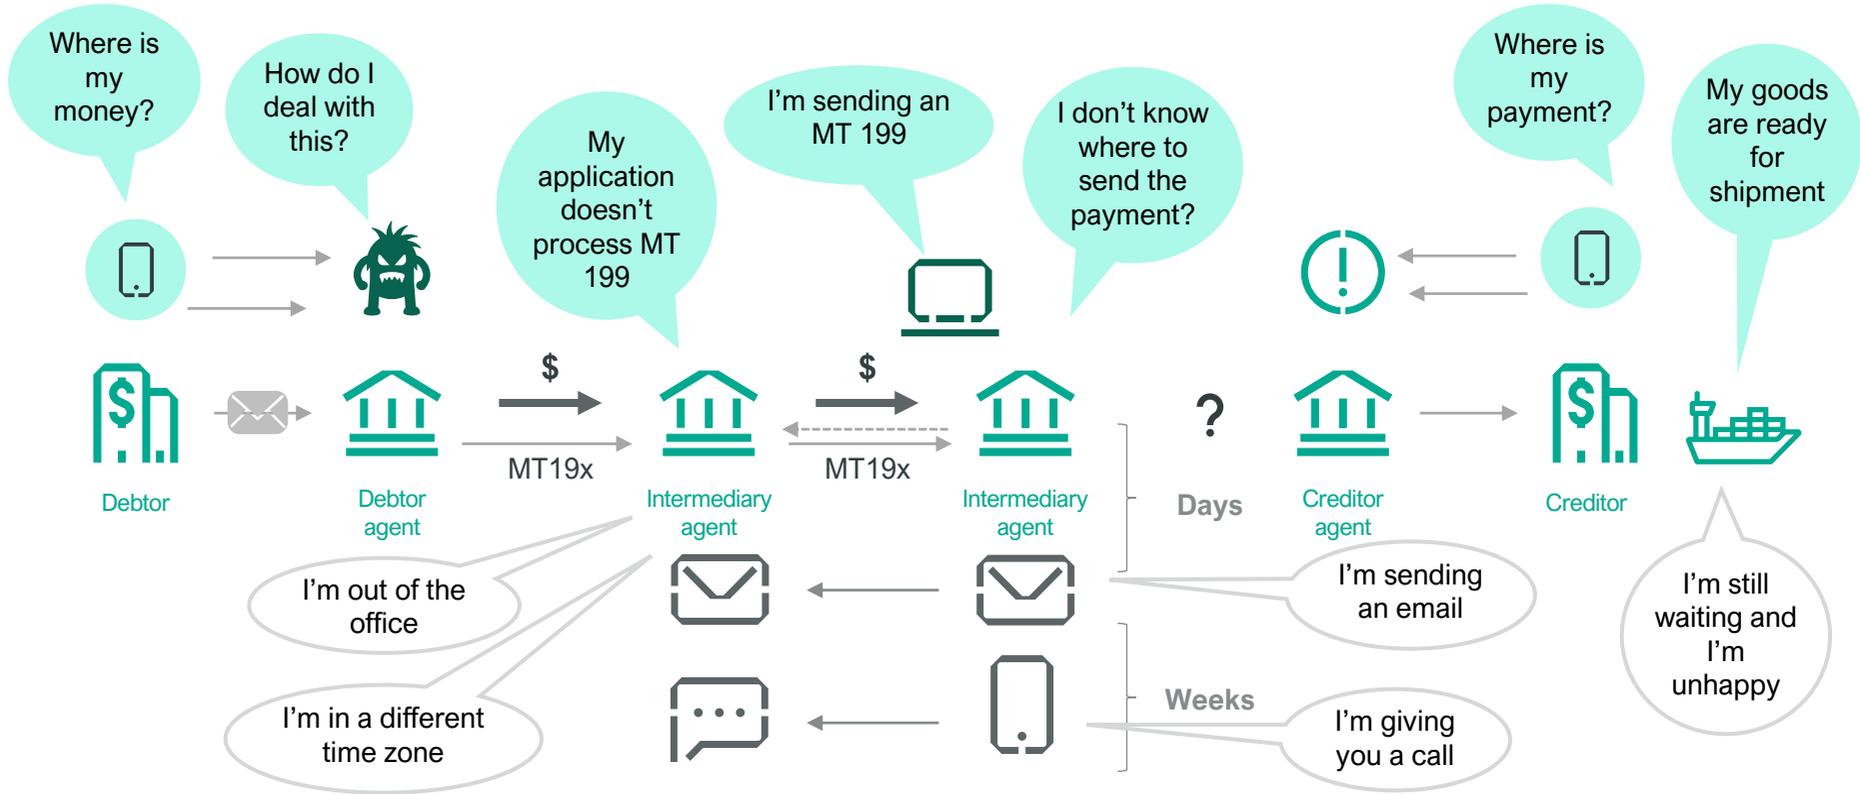

- Customers can migrate at their pace by going to the portal and selecting “BIC activation”

# Payment Investigations – The Future of E&I handling

Feb 2024  
Global webinar for  
Complementors

## Exceptions and investigations today: unstructured processes

X Lack of standards

X Serial processes

X Poor user experience

X Multiple channels

X High operational costs

X Concurrent/unclear requests

## Introducing ISO on E&I – key design concepts of the ISO camt.110/111 messages

### A pair of messages supporting all investigations

- ✓ Clear split between request (camt.110) or response (camt.111)
- ✓ Supporting complex dialogues (continuation of investigation)
- ✓ Introducing the End-to-end Investigation Reference (UUIDv4)

### Investigation type to differentiate usages and support workflows

- ✓ Unambiguous identification of nature of the request
- ✓ Streamlining internal routing of responses received
- ✓ Allowing for limitative data usage for each investigation type

### Structured requests with flexibility for complex queries

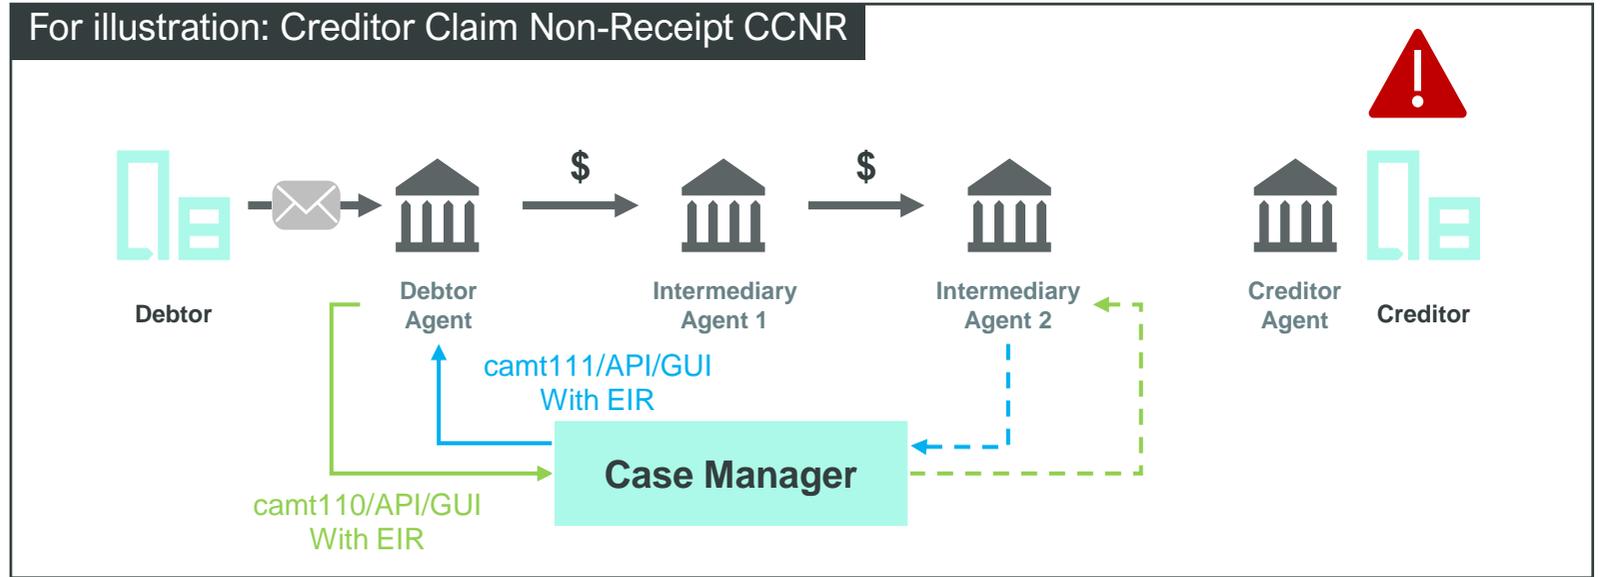

- ✓ Unambiguous reference of underlying transaction (UETR)
- ✓ Usage of external code sets wherever possible
- ✓ Supporting free text only for specific requests

### Investigation Types

- |  |                                |                                 |
|--|--------------------------------|---------------------------------|
| ✓ Request For Information                  | ✓ Unable To Apply              | ✓ Request Value Date Adjustment |
| ✓ Creditor Claim Non-Receipt (incl. Cover) | ✓ Investigation On Charges Due | ✓ Request Use Of Funds          |
|  | ✓ Requesting Debit Authority   | ✓ Other                         |

# Beyond ISO: introducing the Case Manager and Orchestration on E&I

Feb 2024  
Global webinar for  
Complementors

## Orchestration implies multiple concepts

Transparency

Pre-check logic

Smart routing

Data pre-population

Advanced usage analytics

Bypass / Abort

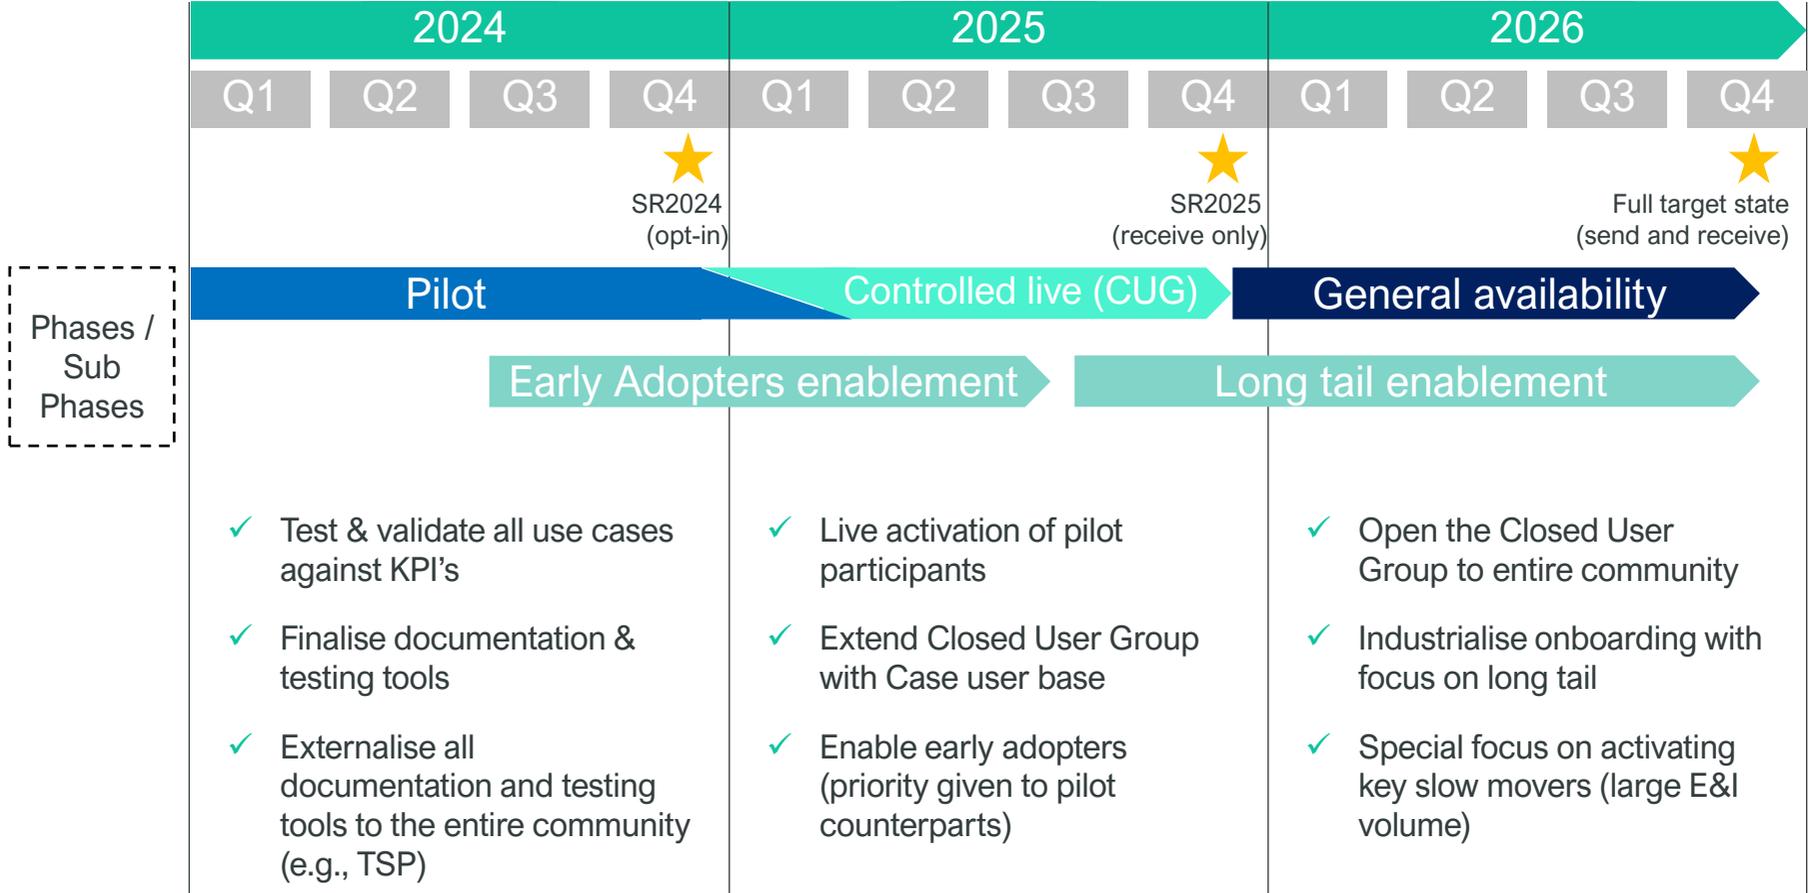

Automated status reminder

Delivery acknowledgement

# Timeline

Feb 2024  
Global webinar for  
Complementors

# CBPR+ self-attestation

February 2024

## ISO 2022 Adoption for CBPR+ - Self-attestation renewal Call to action - Must do for all

February 2024

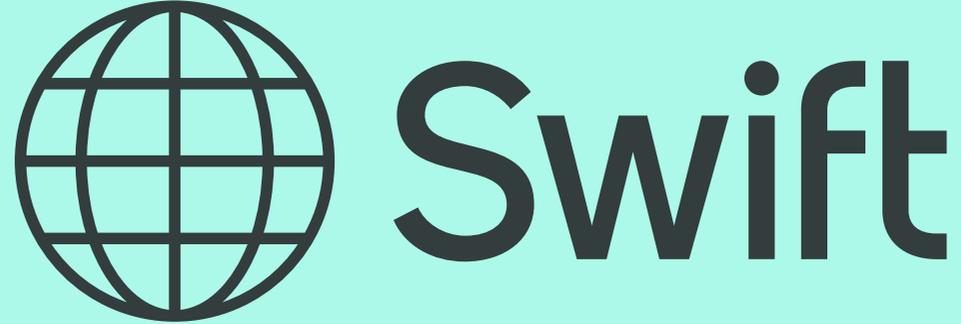

### RENEW YOUR SELF ATTESTATION

- Reminder: renew your self-attestation by 31<sup>st</sup> March 2024**
  - ✓ Please use updated self-attestation form
  - ✓ Test using Vendor Readiness Portal (CBPR+ SR2023 Combined)
  
- Out of 49 partners, 25** have renewed self attestations so far. Reminder emails have been sent.
  
- If not refreshed by the end of Q1 2024**, you will be taken off the list on webpage - Is your partner CBPR+ ready? | Swift
  
- If up to date “Payments” label** under Swift compatible applications, then no need to refresh self-attestation for CBPR+
  
- Self-attestation criteria** to be enforced - To be able to listed as CBPR+ ready, a minimum set of CBPR+ ISO messages **MUST** be supported

# Questions

---

February 2024  
Global webinar for  
Complementors

If you have any questions, please contact your Account Manager  
or raise a case via the **Support** page
