Audience

Alliance Access and Entry administrators

Left and right security officers

Messaging operators

Relationship Management Application (RMA) managers

SWIFT Customer Certification Programme
This course is part of the recommended training path to become a SWIFT Certified Expert - Alliance Access Operator. Please refer to the SWIFT certification programme section on www.swift.com for more details.

This course will teach you how to perform the tasks and actions required for operating Alliance Access and Entry. Alliance Access is a messaging interface designed to connect customers' business applications to all SWIFT's messaging services, effective for a high volume of messages.

Alliance Access receives, processes, routes and forwards messages and files across the SWIFT network and many back-office applications. It is a certified FIN, InterAct, FileAct and RMA interface.

This course covers the following topics:

– Getting to know the Alliance Web Platform

– An overview of Message Preparation

– Using the Message Management Module for FIN and InterAct

– Connecting to the SWIFT Network

– Using the RMA

– Message Searching and Reporting

– Event Log and Monitoring

– Manual FileAct

– Alliance Access Operator Certification Exam (Optional)

The course is delivered by professional trainers and subject matter experts, using a multi-channel learning approach. It combines practical advice and exercises with theoretical modules to give you a well-rounded understanding of the content.

Practical information

This course typically takes two days to complete.

SWIFT is a member-owned cooperative, providing secure financial messaging services to more than 11,000 organisations, across the financial ecosystem, in almost every country in the world. For nearly five decades we have delivered certainty, continuity and excellence by constantly evolving in an everchanging landscape. In today's fast moving, increasingly connected and challenging world, this approach has never been more relevant.
