your solution*

SWIFT Training for Alliance Lite2

Get started with SWIFT Training!

Congratulations! You have purchased or are considering buying SWIFT's first cloud solution Alliance Lite2. Building on nearly 30 years of experience in scoping, designing and delivering training on SWIFT and

related business, we propose a series of training solutions from which you will be able to benefit. Read along and find out more about the new training options!

Getting started

SWIFT in 90 minutes

If you are new to SWIFT, this 90-minute web class will provide you with the necessary foundation on SWIFT, its community, products and services and give you food for thought on how you can benefit more from SWIFT.

Technical training

NEW!

With Alliance Lite2, you will be creating, verifying and authorising your messages in a new Graphical User Interface. You might also need to change parameters, set up new users, or define your correspondent relationships with RMA. Through a mix of hands-on courses and live training over the web class, you will receive the necessary knowledge to use and maintain Alliance Lite2.

Message standards training

Understanding the SWIFT message standards will help you to increase efficiency and save costs. Therefore, we offer in-depth classroom training giving you the opportunity to interact with an experienced instructor. Our classroom courses cover a perfect mix of theory, case studies and exercises. We offer message standards courses for the following business areas:

- Payments and cash management
- Securities and funds distribution
- Trade services
- Treasury

Creating SWIFT messages

This one-day course combines training on business flows for most used messages and the actual message preparation process in Alliance Lite2. You will be able to experience the Alliance interface and perform hands-on exercises using the new graphical interface.

Operating RMA

Learn more about the RMA, how to use RMA (queries and answers, authorisation, pending actions) through several scenarios and RMA administration through this new web class.

Understanding Alliance Lite2

During this half-day web class, you will learn about Alliance Lite2, installing Lite2 (software installation, O2M, set-up of Lite2 users) and connecting your back-office to Lite2 (incl. AutoClient).

Interested in On-site training?

If you prefer a tailor-made or on-site training, feel free to contact us or complete the online request form on the SWIFT Training website. Together with our experts, you can discuss your specific training requirements and organisational details.
