

## SUPPLEMENTARY TERMS TO THE G4C PILOT TERMS AND CONDITIONS

- I. The Parties agree to extend the application of the *SWIFT gpi for Corporates Pilot Terms and Conditions* to Phases 2 and 3 of the g4C Pilot, as supplemented with the present terms.
- II. When piloting SWIFT gpi for Corporates in the gpi test and training environment, the Pilot Participant will typically use test data (which is either anonymised or fictitious). If some Pilot Participants wish to test with real business data, they must limit the amount of such data to the strictest minimum required to achieve their testing purposes, and agree on a bilateral basis on which real transaction data to use and, where appropriate, any additional confidentiality and security requirements that may be required with their counterparties.
- III. When piloting SWIFT gpi for Corporates in the gpi production environment, the Participant may use data relating to real business transactions, provided the Participant will mitigate any related financial risks from using real transaction data as part of a Pilot service to the fullest extent possible, including agreement - on a bilateral basis with their counterparties - the scope and value of transactions that they want to pilot.
- IV. The Participant acknowledges that SWIFT will track the status of the payment and status confirmation messages being piloted, and may monitor the Participant's compliance with the applicable technical business rules. They agree that SWIFT may retrieve the relevant payment and status confirmation messages sent or received by the Participant in connection with the Pilot and may access, use and disclose related traffic and message data as reasonably necessary for such monitoring and tracking on conditions to be further specified and communicated by SWIFT during the Pilot.
